Hangzhou has enjoyed a history of over 2,200 years since the county administration was established in Qin Dynasty. It is one of the cradles of the Huaxia (China) Civilization. The Kuahuqiao Ruins show that there were human beings living in the Hangzhou area as early as 8,000 years ago. The Liangzhu Culture, over 5,000 years ago, was known as "the Dawn of Civilization."

Hangzhou, one of the seven ancient capitals of China, was the capital of Wuyue State of the Five-Dynasties and also the capital of the Southern Song Dynasty. In the 13th century, the Italian traveler Marco Polo admired Hangzhou as "the Most Splendid and Luxurious City in the World." Hangzhou was called Qiantang in ancient time. In the ninth year of Kaihuang of Sui Dynasty (589, Hangzhou was founded to replace the original Qiantang County and the name of Hangzhou was recorded for the first time in history.

In the first year of the Republic of China (1912), the original Qiantang County and Renhe County were merged into Hangzhou County. In the 16th year of the Republic of China (1927), Hangzhou County was dismantled and Hangzhou was founded as a city. It was on May 3, 1949 when Hangzhou was liberated that it began to write its new chapter of development in history.

preserved today. A Chinese imperial mausoleum usually consists of two parts, the divine road and the burial palace. The marble archway, or paifang, is the beginning of the divine road and of the whole Ming Tombs. This carved archway is the largest existent one in China. It bears patterns of clouds and dragons, which is a characteristic of imperial architecture. The divine road is a passage in front of the tombs to facilitate the sacrificial ceremonies.
